MAINTENANCE

**Powder coating aluminum
Dekton, HPL Compact**

Clean the surface regularly with warm water and neutral soap. Use a non-abrasive sponge or cloth.

Rinse with plenty of water immediately after cleaning.

Iroko wood

Iroko may change color or even crack due to humidity levels and sudden changes in temperature. Iroko undergoes a natural process of oxidation that affects its color, which turns a silver-grey shade. Iroko furniture is treated with a waterproof sealant. We recommend treating the wood twice a year:

1. Dampen a rag with soap solution and gently wipe the surface of the wood. The soap solution will free the surface of dust and contaminating agents from pollution.
2. Once the soap solution has dried we will proceed to the application of the Cromaprotect water based re-toner. Dampen a sponge with the re-toner and apply onto the surface of the wood you want to treat.
