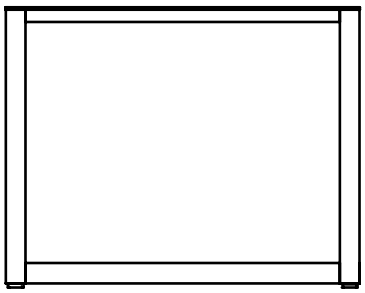
club

The CLUB collection, designed by Andrés Bluth for BIVAQ, is a sober and elegant concept of straight lines and sharp angles composed of different options of chair, lounger and hammock. Its simplicity makes this collection perfect for different atmospheres and designs. A refreshing and ethereal concept that blends with both classic and avant-garde projects.

CLUB consists of an extruded aluminum structure finished with polyester paint. The seats and backrests are made of Vinytex fabric, providing freshness and lightness to the designs and available in different colors. The table tops are produced in aluminum and HPL compact in a wide variety of tones. CLUB is a versatile, functional and contemporary proposal, stackable and easy to collect, perfect for versatile spaces for different purposes throughout the day.

club low table 45×45



Frame
• Extruded aluminum finished with polyester powder coating.

Table top
Material
• Aluminium plate, polyester powder coating (3mm).

• Dekton porcelain (8mm).

• HPL Compact (10mm)
Solid phenolic core laminate.

Maintenance
Powder coating aluminium
• Clean the surface regularly with warm water and neutral soap. Use a non-abrasive sponge or cloth.
• Rinse with plenty of water immediately after cleaning and remove the water on the surface witha drying cloth to help you avoid water stains.

Dekton
• Apply neutral soap to the affected area and gently rub in a circular motion using a damp microfibre sponge.
• Leave for a couple of minutes and wipe with a cloth to remove any soap residue. Then dry it with kitchen paper.

HPL Compact
• HPL should be cleaned regularly but do not require any special maintenance. Just a damp cloth with warm water or mild detergent.
• Almost all household cleaning products or desinfectants can be used as long as they are not abrasive or higly alkaline.
