

The DATS collection, designed by Andrés Bluth for BIVAQ, is a program of versatile tables with light bodies and rectilinear shapes. DATS designs are available in a wide variety of heights, dimensions and combinations of structure and tops, creating up to 500 possible designs that make them perfect for different spaces and environments. The DATS table is available in two heights and different surface options, both square and rectangular. The collection is complemented by a bench available in various lengths.

DATS consists of a structure in extruded aluminum and finished with polyester paint, with different color options and different plank options, in transparent glass, painted, laminated porcelain, compact, Dekton or iroko wood from regulated and sustainable forests. Each material is available in a wide variety of colors creating a program with infinite options.

dots, low table 35

Frame

- Extruded aluminum finished with polyester powder paint.

Table top

Material

- Aluminium plate, polyester powder coating (8mm).
- Dekton porcelain (8mm).
- HPL Compact (10mm)
Solid phenolic core laminate.
- Iroko wood slats (20mm).

Maintenance

Powder coating aluminium

- Clean the surface regularly with warm water and neutral soap. Use a non-abrasive sponge or cloth.
- Rinse with plenty of water immediately after cleaning and remove the water on the surface with a drying cloth to help you avoid water stains.

Dekton

- Apply neutral soap to the affected area and gently rub in a circular motion using a damp microfibre sponge.

- Leave for a couple of minutes and wipe with a cloth to remove any soap residue. Then dry it with kitchen paper.

HPL Compact

- HPL should be cleaned regularly but do not require any special maintenance. Just a damp cloth with warm water or mild detergent.
- Almost all household cleaning products or disinfectants can be used as long as they are not abrasive or highly alkaline.

Iroko wood

Iroko wood may experience color variations or develop cracks in response to fluctuations in humidity and sudden temperature changes. As part of its natural oxidation process, the wood tends to adopt a silver-grey hue over time. To maintain the quality of Iroko furniture, we recommend treating it with a waterproof sealant twice annually.

- Begin by dampening a cloth with a solution of soap and water. Gently wipe the wood surface to remove dust and pollutants.
- Once the surface is dry, apply Cromaprotect water-based re-toner using a damp sponge. Ensure even coverage over the areas requiring treatment.

Weight and volume

Depending on sizes.

Other features

Sizes available: 160×90, 140×90, 140×140, 90×90.

Available waterproof cover.

Suitable for outdoor use.

Resistant to weathering and sunlight.

See all the available colors in our current Bivaq Catalog or website.
