

The GARDA collection, designed by Joan Gaspar for BIVAQ, is inspired by the great icons of constructivist and rationalist architecture. A concept based on the chairs and armchairs of the 50s with surnames such as Le Corbusier, Vestergard Jensen, Gio Ponti or Olli Borg, transferred by Gaspar to outdoor furniture. Its functional and apparently simple lines create a collection designed above all to be lived in. A collection that emerges from the fascination for industrialization and the search for practicality through a tubular structure and a fabric base on which the cushions rest. GARDA dispenses with all unnecessary decorative elements and focuses on comfort, lightness and touch.

GARDA is a collection primarily adaptable to different space concepts, with contemporary inspiration, but with quality and friendly forms. Its extruded aluminum structure and fabric bring subtlety and comfort to the designs, available in different options, from one-seater armchairs, 2 or 3-seater sofas and chairs. GARDA has also been transferred into a table, available in different types of surface and a side table convertible into a footrest. The collection has been worked in a range of quality and soft colors, with tones from nature that fit with the search for simplification in design. A concept designed for relaxation, a nod to the architectural memory that aims to transport us to another era.

# garda, low table 65x65

## Frame

- Extruded aluminum finished with polyester powder paint.

## Table top

### Material

- Aluminium plate, polyester powder coating (8mm).
- Dekton porcelain (8mm).
- HPL Compact (10mm)  
Solid phenolic core laminate.
- Iroko wood slats (27mm).

## Maintenance

### Powder coating aluminium

- Clean the surface regularly with warm water and neutral soap. Use a non-abrasive sponge or cloth.
- Rinse with plenty of water immediately after cleaning and remove the water on the surface with a drying cloth to help you avoid water stains.

### Dekton

- Apply neutral soap to the affected area and gently rub in a circular motion using a damp microfibre sponge.

- Leave for a couple of minutes and wipe with a cloth to remove any soap residue. Then dry it with kitchen paper.

### HPL Compact

- HPL should be cleaned regularly but do not require any special maintenance. Just a damp cloth with warm water or mild detergent.

- Almost all household cleaning products or disinfectants can be used as long as they are not abrasive or highly alkaline.

### Iroko wood

To maintain the quality of Iroko furniture, we recommend treating it with a waterproof sealant twice annually.

- Begin by dampening a cloth with a solution of soap and water. Gently wipe the wood surface to remove dust and pollutants.
- Once the surface is dry, apply Cromaprotect water-based re-toner using a damp sponge. Ensure even coverage over the areas requiring treatment.

## Weight and volume

Product	Kg/Lbs	m3/cft
garda low table (aluminium table top)	13/29	0,4/14
garda low table (iroko/compact table top)	11/24	0,4/14
garda low table (dektion table top)	17/37	0,4/14

## Other features

The product is delivered assembled.  
Available waterproof cover.  
Suitable for outdoor use.  
Resistant to weathering and sunlight.  
See all the available colors in our current Bivaq Catalog or website.
