Aluminum frame painting color

Aluminum is an environmental friendly, light and tough metal with an excellent strength to weight ratio and corrosion resistance, making it an ideal material for outdoor furniture. By powder coating we give to the aluminum an advanced method of applying protective, resistance to chemicals, corrosion, UV weathering and decorative coating. Choose your Bivaq furniture finish among all these painting colors.

Wood slats

Iroko

Iroko is an intertropical African tree that is characterized by its durable timber which does not require any preservation treatment and therefore offers economic and ecological advantages that make it an ideal material for outdoor use. Moreover, iroko has an interesting potential in carbon dioxide sequestration and soil improvement. Also is a highly durable hardwood that is both insect and rot resistant, making it the ideal type of wood for outdoor furniture products.

Table top

Low table: available in 1 or 2 heights.
The additional tray (2 height) can be requested in wood, Dekton or painted aluminum.

HPL Compact top

HPL Compact is a high pressure structural laminate, built up from multiple layers of wood-based fibers impregnated with thermosetting resins and surface layers on both sides, having decorative colors or designs. Thicknesses from 10mm to 12mm it is particularly suited to use in high humidity, high impact areas. Compact is impressively strong and damage resistant and has remarkable structural stability weather and light protecting properties.

Dekton®

Dekton is made from a mixture of inorganic raw materials found in glass, porcelain tile and natural quartz. The process by which it is made combines technologies from these three industries, resulting in a proprietary new advancement called Particle Sintering Technology (PST). Some of the more prominent characteristics of Dekton are: Highly Resistant to (UV) Light, Suitable for Outdoor use, non-porous Surface, temperature Resistant, High Mechanical Resistance, color stability, low maintenance, non-combustibility, dimensional stability.

Fabric

Acrylic fabrics

The acrylic fabrics that Bivaq uses in its collections are manufactured with solution dyed acrylic fiber, a process which adds the pigments before the fibers are extruded, this allows the color to be mixed into the solution thoroughly, bringing the color all the way through the fiber once it is extruded, creating a colorfast fabric much stronger than that obtained by dyeing the thread. As a result, we have a fabric that is less vulnerable to UV radiation and the guarantee that its colors will remain permanent and bright for many years.

Vinytex fabrics

Vinytex is a generic term for a woven, open-mesh fabric made from a vinyl coated, high strength polyester yarn. Combines a textile appearance with the extreme weather resistant properties ensuring lasting colour with no sag effect. This fabric is hard wearing, wipeable, quick-drying and resistant to fading, mildew and wear & tear under even the most severe weather conditions.
